

Summer Jobs in Computer and Information Science 2008

Informaatiotekniikan kesäteekkarihaku 2008

Job description: supervised research in one of the research projects on *machine learning*, *algorithmic data analysis* and *bioinformatics* at the TKK Department of Information and Computer Science during summer 2008

Prerequisites: success in studies, interest in scientific research work

Application deadline: 31 January 2008

More information: <http://www.cis.hut.fi/job>

THE Department of Information and Computer Science at the Helsinki University of Technology (TKK) is a leading research center in the fields of machine learning, algorithmic data analysis and bioinformatics. The department hosts the Adaptive Informatics Research Centre, and partially Algodan, both of which are Centres of Excellence in research nominated by the Academy of Finland. The Department has powerful computing infrastructure that is used to simulate and develop algorithmic and computational methods.
